- Web Development
- Java
- DBMS

PROJECTS

MultiMedia Video Content Summarization | Machine Learning, OpenCV **Ongoing**

- "My BE project, 'Multimodal Video Content Summarization Using Machine Learning,' aims to generate concise summaries by integrating video, audio, and text modalities. Using feature extraction, multimodal fusion, and advanced models like transformers, the system identifies key content and creates meaningful summaries efficiently."

Online College Admission System(2023) | HTML, CSS, JS, SQL, Node.js, PHP **2023**

- "The Online College Admission System is a web application designed for student application process. Built with technologies like HTML, CSS, JavaScript, and databases like SQL it enables efficient management of student registrations, user-friendly interface."

Spotify Website(Ongoing) | HTML, CSS, JavaScript and SQL **2024-25**

- The Spotify website allows users to stream music, podcasts, and playlists from a vast library of content. It offers personalized recommendations, curated playlists, and features like search, browse, and playback controls.
